ı|ı.ı|ı. Networking Academy
CISCO™

26 Sep 2019

Dear Harsh Bakori,

Congratulations on completing the Cisco® CCNA Cybersecurity Operations course as part of the Cisco Networking Academy® program. This hands-on, lab-oriented course has prepared you for exciting career opportunities in the technology industry.

You have achieved student level credential for completing CCNA Cybersecurity Operations, and acquired competencies that include the following:

- Explain the role of the role of the Cybersecurity Operations Analyst in the enterprise.

- Explain the Windows Operating System and the Linux Operating System features and characteristics needed to support cybersecurity analyses.

- Explain the operation of network infrastructures.

- Analyze the operation of network protocols and services.

- Classify the various types of network attacks.

- Use network monitoring tools to identify attacks against network protocols and services.

- Use various methods to prevent malicious access to computer networks, hosts and data.

- Explain the impacts of cryptography on network security monitoring.

- Explain how to investigate endpoint vulnerabilities and attacks.

- Evaluate network security alerts.

- Analyze network intrusion data to identify vulnerabilities and compromised hosts.

- Explain how security incidents are handled by CSIRTs.

Technical literacy is more important today than ever before, and Cisco is proud to provide you with the knowledge and skills necessary to build and maintain digital networks.

Please accept my best wishes for your continued success.

Sincerely,

Chuck Robbins
